

# RIPE 57 Technical Summary

James Aldridge, RIPE NCC  
*james@ripe.net*

# Overview

- The Meeting Team
- The Network
- Problems encountered
- Statistics
- Wireless LAN activity

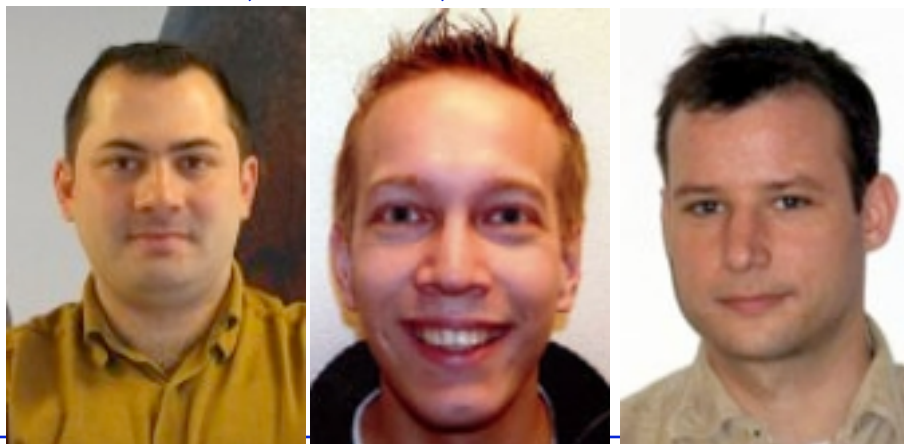

# The Meeting Team

- Changes to the team since RIPE 56
  - Old timers: Brian, Erik, James, Razvan, Ruben

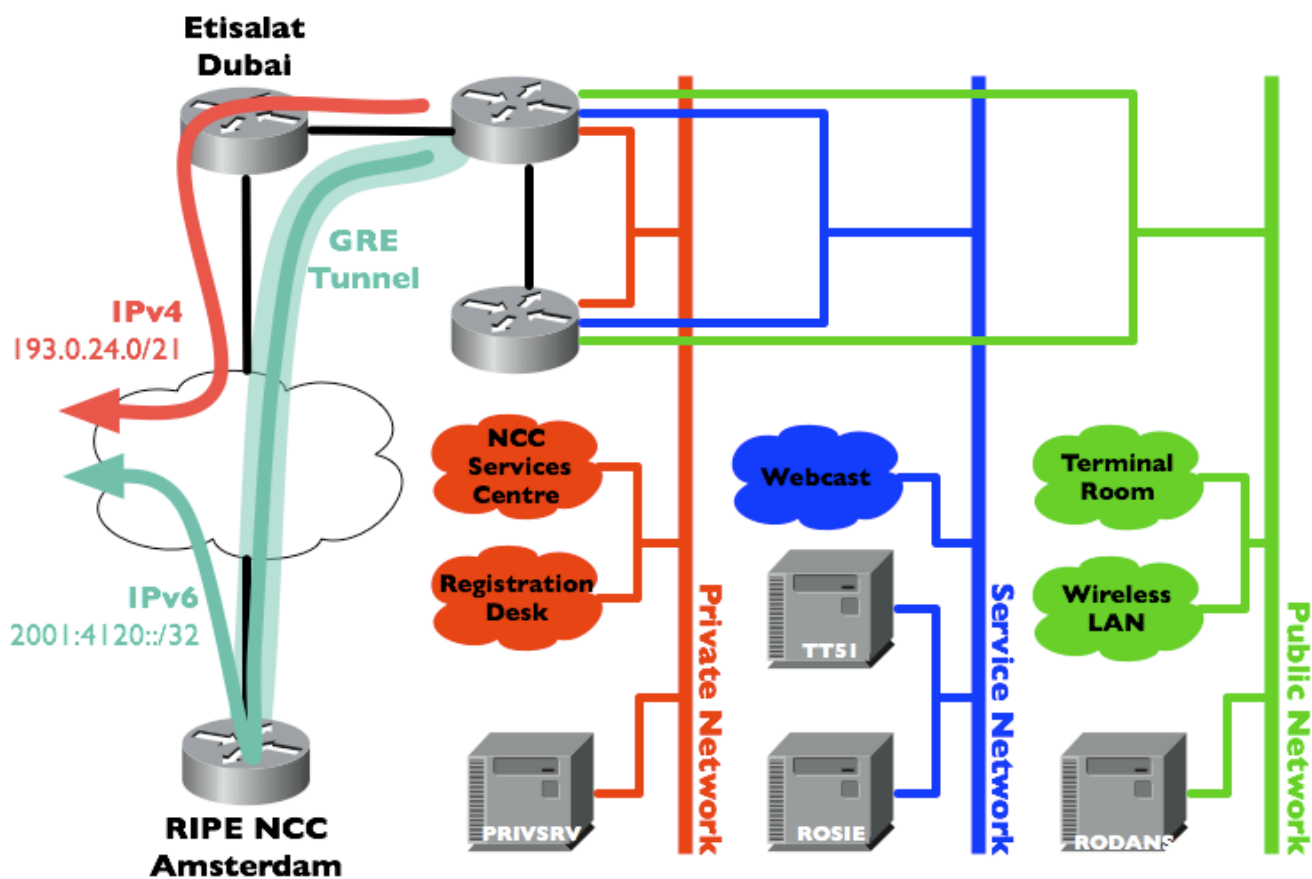

- Newcomers: Luis, Menno, Tim

# The Network

- IPv4 to Etisalat
- IPv6 tunneled to RIPE NCC in Amsterdam

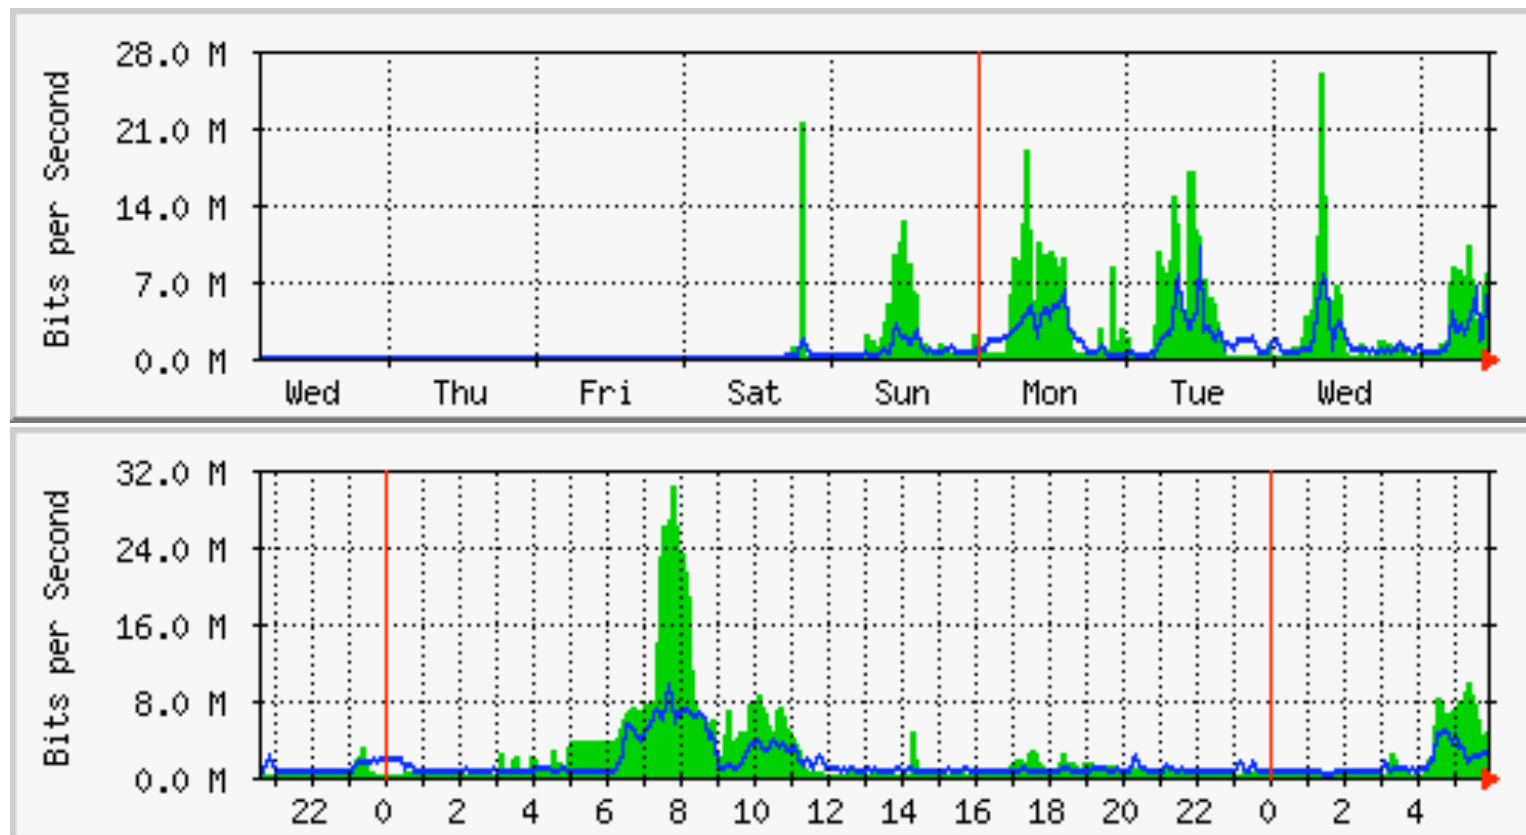

# Problems Encountered

- Wiring
  - We've run about 1km of UTP cable around the meeting area to build the network
- Initial connectivity problems on Sunday morning
  - Announcing the RIPE Meeting address range from a new location always causes some problems
  - Configuration of Etisalat proxies
- Power outage on Wednesday morning
  - Took out our main switch and our transit link
  - Our BGP announcement from Etisalat to the rest of the world was not immediately reinstated following the outage.

# Statistics

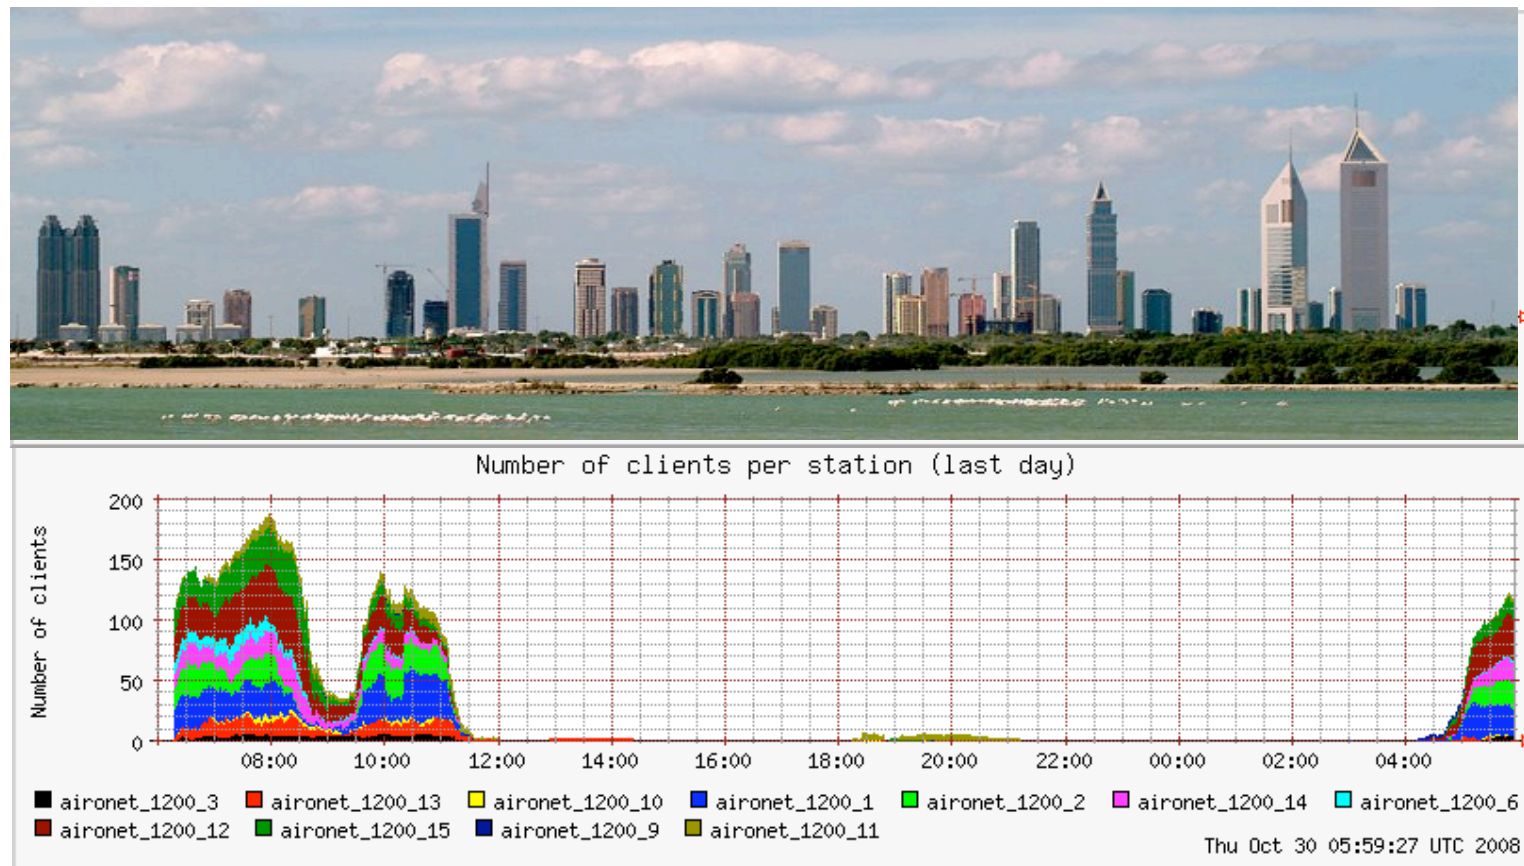

- Traffic
  - Peak approximately 30 Mbps

# Statistics

- Wireless clients
  - Peak of around 200 users
